### 4141 Series

**Full Port Forged Brass Uni-Flange Ball Valves**  
with Detachable Rotating Flange  
& Multi-Function Hi-Flow Hose Drain  
Adjustable Packing Gland, Nuts & Bolts  
IPS x Rotating Flange  
600 WOG - ISO 9001

Webstone product specifications in U.S. customary units are approximate and are provided for reference only. Webstone reserves the right to change or modify product design, construction, specifications or materials without prior notice and without incurring any obligation to make such changes and modifications on Webstone products previously or subsequently sold.
Specifications: Designed for residential, commercial or industrial use with water or a glycol mixture. This approved Webstone valve is actuated by a blowout proof stem and features an adjustable packing gland. Flange features a conical inlet to minimize turbulence. The rotating flange is secured by a snug-fit snap-ring that provides greater control over positioning during installation. Multi-directional main valve allows for draining from either side of the pump. Threaded ends comply with ANSI B1.20.1.
