**Specifications:** Designed for residential, commercial or industrial use for geothermal applications in ground loops with water or glycol mixture only. This approved Webstone valve is actuated by a blowout proof stem and features an adjustable packing gland. Flange end features a conical inlet to minimize system turbulence. HV models fit both standard and high velocity pumps. Plugged ends are used to directionally fill earth or system loops. Reversible T-Flow handle allows for flow path versatility. Flange x Press ends for easy installation.
